Conclusion |

## Sommario/riassunto

An event, defined as the decisive turn, the surprising point in the plot of a narrative, constitutes its tellability, the motivation for reading it. This book describes a framework for a narratological definition of eventfulness and its dependence on the historical, socio-cultural and literary context. A series of fifteen analyses of British novels and tales, from late medieval and early modern times to the late 20th century, demonstrates how this concept can be put into practice for a new, specifically contextual interpretation of the central relevance of these texts. The examples include Chaucer's "Miller's Tale", Behn's "Oroonoko", Defoe's "Moll Flanders", Richardson's "Pamela", Fielding's "Tom Jones", Dickens's "Great Expectations", Hardy's "On the Western Circuit", James's "The Beast in the Jungle", Joyce's "Grace", Conrad's "Shadow-Line", Woolf's "Unwritten Novel", Lawrence's "Fanny and Annie", Mansfield's "At the Bay", Fowles's "Enigma" and Swift's "Last Orders". This selection is focused on the transitional period from 19th-century realism to 20th-century modernism because during these decades traditional concepts of what counts as an event were variously problematized; therefore, these texts provide a particularly interesting field for testing the analytical capacity of the term of eventfulness.

#### Sommario/riassunto

A guide to curbing monopoly power in stock markets Engaging and informative, Regulating Competition in Stock Markets skillfully analyzes the impact of the recent global financial crisis on health and happiness, and uses this opportunity to put regulatory systems in perspective. Happiness is lost because of emotional and physical health deterioration resulting from the crisis. Therefore, the authors conclude that financial crisis prevention should be the focus of public policy. This book is the most comprehensive study so far on potential risks to the stock market, especially
