ISBN	9788884532534 (eBook)
Descrizione fisica	1 online resource (335 pages)
Collana	Storia e Geografia ; ; 1
Disciplina	853
Soggetti	Women in literature Italian Literature
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	This text proposes a rereading of the Decameron that traces the female figures - 'constrained' as we are told in the Proem, by the 'wishes', 'desires' and 'orders' of fathers, mothers, brothers and husbands - in their attempt to open up areas of personal life. The possession of the female body, considered as part of the family property in a social context governed by a commercial rationale, is an instrument of the violence characterising all social relations, which Boccaccio indicates as a cause for the wrath of God that exploded in the plague of 1348. Moreover, their bodies also become an instrument in the hands of the women themselves when they decide - with all the ambiguity which the context imposed (even on the author) - to repossess the same to use it as a weapon of revenge, an occasion of joy or a gift of love. Il testo propone una rilettura del Decameron seguendo le figure femminili "costrette", come dice il Proemio, "da' voleri, da' piaceri, da' comandamenti de' padri, delle madri, de' fratelli e de' mariti" nei loro tentativi di aprire spazi di vita propria. Il possesso del corpo delle donne, parte del patrimonio familiare nel contesto sociale guidato dalla ragion di mercatura, è uno strumento della violenza che connota tutti i rapporti sociali, e che il Boccaccio indica come causa dell'ira di Dio esplosa nella peste del 1348. Ma diviene anche strumento delle donne

quando decidono con tutta l'ambiguità che il contesto imponeva (anche all'Autore) di riappropriarsene per farne arma di vendetta, occasione di gioia, o dono d'amore.

Livello bibliografico	Monografia
Nota di contenuto	1. Epidemiology of Idiopathic Pulmonary Fibrosis -- 2. Biomarkers in Idiopathic Pulmonary Fibrosis -- 3. Diagnosis of IPF -- 4. Pharmacological Management of Idiopathic Pulmonary Fibrosis -- 5. Acute Exacerbation of Idiopathic Pulmonary Fibrosis -- 6. Gastroesophageal Reflux and Idiopathic Pulmonary Fibrosis -- 7. Perspective Chapter: Pulmonary System and Sjogren's Syndrome -- 8. Lung Transplantation in Idiopathic Pulmonary Fibrosis.
Sommario/riassunto	Idiopathic pulmonary fibrosis (IPF) affects 13-20 people per 100,000 population worldwide. In the United States, approximately 100,000 people have IPF with 30,000-40,000 new cases diagnosed annually. Diagnosis remains a challenge with a significant lag between symptoms onset and diagnosis. Delayed diagnosis and treatment can carry high morbidity and mortality. This book provides concise, easy-to-read, and up-to-date information as it relates to clinical presentation, diagnosis, and treatment of IPF. Despite, adequate treatment, the disease progresses, and a lung transplant is necessary in some cases. This book also discusses the role of lung transplants for IPF and its complications. It is a useful resource for primary care physicians, allied

health professionals, hospitalists, and pulmonary physicians who take care of patients with IPF.

3. Record Nr.	UNINA9910948233103321
Titolo	Continuum : lifelong learning in neurology
Pubbl/distr/stampa	[Hagerstown, Md.], : Lippincott Williams & Wilkins
ISSN	1538-6899
