1. Record Nr.   UNISA996198263803316

   Titolo   Collaboration and Technology [[electronic resource]] : 20th
                       International Conference, CRIWG 2014, Santiago, Chile, September 7-
                       10, 2014, Proceedings / / edited by Nelson Baloian, Frada Burstein,
                       Hiroaki Ogata, Flavia Santoro, Gustavo Zurita

   Pubbl/distr/stampa Cham : , : Springer International Publishing : , : Imprint : Springer, ,
                       2014

   ISBN   3-319-10166-8

   Edizione   [1st ed. 2014.]

   Descrizione fisica 1 online resource (XXII, 382 p. 123 illus.)

   Collana   Information Systems and Applications, incl. Internet/Web, and HCI ; ;
                       8658

   Disciplina   005.376

   Soggetti   Application software
                       Education—Data processing
                       User interfaces (Computer systems)
                       Computers and civilization
                       Information storage and retrieval
                       Data mining
                       Information Systems Applications (incl. Internet)
                       Computers and Education
                       User Interfaces and Human Computer Interaction
                       Computers and Society
                       Information Storage and Retrieval
                       Data Mining and Knowledge Discovery

   Lingua di pubblicazione Inglese

   Sommario/riassunto This book constitutes the proceedings of the 20th Collaboration
                       Researchers' International Working Group Conference on Collaboration
                       and Technology, held in Santiago, Chile, in September 2014. The 16
                       revised papers presented together with 18 progress papers and 3
                       invited talks were carefully reviewed and selected from 49 submissions.
                       The papers published in proceedings of this year's and past CRIWG

conferences reflect the trends in collaborative computing research and its evolution. There was a growing interest in social networks analysis, crowdsourcing and computer support for large communities in general. A special research topic which has been traditionally present in the CRIWG proceedings has been collaborative learning.
