Sommario/riassunto	Describing Spoken English provides a practical and descriptive introduction to the pronunciation of contemporary English. It presumes no prior knowledge of phonetics and phonology. Charles Kreidler describes the principal varieties of English in the world today. Whilst concentrating on the phonological elements they share, the author sets out specific differences as minor variations on a theme. Although theoretically orientated towards generative phonology, theory is minimal and the book is clear, comprehensive and accessible to undergraduate and postgraduate students of linguistic

Sommario/riassunto	This book constitutes the thoroughly refereed and revised selected papers from the 10th International Workshop on Agents and Data

Mining Interactions, ADMI 2014, held in Paris, France, in May 2014 as satellite workshop of AAMAS 2014, the 13th International Conference on Autonomous Agents and Multiagent Systems. The 11 papers presented were carefully reviewed and selected from numerous submissions for inclusion in this volume. They present current research and engineering results, as well as potential challenges and prospects encountered in the respective communities and the coupling between agents and data mining.
