

1. Record Nr.	UNISA996199054303316
Titolo	Method of Medicine . Volume III // edited by Ian Johnston, G. H. R. Horsley
Pubbl/distr/stampa	Cambridge, MA : , : Harvard University Press, , 2011
ISBN	0-674-99680-1
Descrizione fisica	1 online resource (592 pages) : illustrations
Disciplina	610
Soggetti	Medicine - Early works to 1800
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Manuscripts - Abbreviations - Synopsis of Chapters - Method of Medicine - Book X - Book XI - Book XII - Book XIII - Book XIV - Index of Names - General Index.
Sommario/riassunto	Galen of Pergamum (129-?199/216), physician to the court of the emperor Marcus Aurelius, was a philosopher, scientist, and medical historian, a theoretician and practitioner, who wrote forcefully and prolifically on an astonishing range of subjects and whose impact on later eras rivaled that of Aristotle. Galen synthesized the entirety of Greek medicine as a basis for his own doctrines and practice, which comprehensively embraced theory, practical knowledge, experiment, logic, and a deep understanding of human life and society. New to the Loeb Classical Library is Method of Medicine, a systematic and comprehensive account of the principles of treating injury and disease and one of Galen's greatest and most influential works. Enlivening the detailed case studies are many theoretical and polemical discussions, acute social commentary, and personal reflections.
