Competing Paradigms in the OECD and Their Impact on the WTO Agricultural Talks; 14. The Changing Economics of Agriculture and the Environment; 15. Rational Policy Processes for a

	Pluralistic World; Index
Sommario/riassunto	Agricultural policy reform has become a very hot topic. Over the next couple of years we will see the funding for these programs being hotly debated. The thesis of this book is that a better-informed public is essential to bring rationality to farm policy. This book provides telling evidence that markets work, that competent commercial farmers will earn returns on their resources as high as those earned elsewhere in the absence of income transfer to farmers.
