Collana	Loeb classical library ; ; LCL292
Disciplina	610.938
Soggetti	Medicine, Greek and Roman Materia medica
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>A. Cornelius Celsus was author, probably during the reign of the Roman Emperor Tiberius (14--37 CE), of a general encyclopaedia of agriculture, medicine, military arts, rhetoric, philosophy, and jurisprudence, in that order of subjects. Of all this great work there survives only the 8 books on medicine (De Medicina). Book I: after an excellent survey of Greek schools (Dogmatic, Methodic, Empiric) of medicine come sensible dietetics or health preservation which will always be applicable. Book II: deals with prognosis, diagnosis of symptoms (which he stresses strongly), and general therapeutics. Book III: internal ailments: fevers and general diseases. Book IV: local bodily diseases. Next come two pharmacological books, Book V: treatment by drugs of general diseases; and Book VI: of local diseases. Book VII and Book VIII deal with surgery; these books contain accounts of many operations, including amputation. Celsus was not a professional doctor of medicine or a surgeon, but a practical layman whose On Medicine, written in a clear and neat style, for lay readers, is partly a result of his medical treatment of his household (slaves included) and partly a presentation of information gained from many Greek authorities. From no other source can we learn so much of the condition of medical science up to his own time. The Loeb Classical Library edition of Celsus is in three volumes.</p>
