

1. Record Nr.	UNISA996199669703316
Titolo	Skeletal muscle
Pubbl/distr/stampa	[London], : BioMed Central Ltd., 2011-
Soggetti	Musculoskeletal system Aparell locomotor Muscle, Skeletal Periodicals. Revistes electròniques. Periodical
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Refereed/Peer-reviewed
Sommario/riassunto	A peer-reviewed, open access, online journal that publishes articles investigating molecular mechanisms underlying the biology of skeletal muscle. A wide range of skeletal muscle biology is included: development, metabolism, the regulation of mass and function, aging, degeneration, dystrophy and regeneration. The emphasis is on understanding adult skeletal muscle, its maintenance, and its interactions with non-muscle cell types and regulatory modulators.
