1. **Record Nr.**   UNISA996199682203316

   Titolo   System Analysis and Modeling: Models and Reusability [[electronic resource]] : 8th International Conference, SAM 2014, Valencia, Spain, September 29-30, 2014. Proceedings / / edited by Daniel Amyot, Pau Fonseca i Casas, Gunter Mussbacher

   Pubbl/distr/stampa   Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014

   ISBN   3-319-11743-2

   Edizione   [1st ed. 2014.]

   Descrizione fisica   1 online resource (XXII, 314 p. 124 illus.)

   Collana   Programming and Software Engineering ; ; 8769

   Disciplina   003

   Soggetti   Software engineering
                              Computer communication systems
                              Programming languages (Electronic computers)
                              Management information systems
                              Computer science
                              Computer logic
                              Software Engineering
                              Computer Communication Networks
                              Programming Languages, Compilers, Interpreters
                              Management of Computing and Information Systems
                              Logics and Meanings of Programs

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Note generali   Bibliographic Level Mode of Issuance: Monograph

   Nota di contenuto   Reuse -- Availability, safety and optimization -- Sequences and interactions -- Testing -- Metrics, constraints and repositories.- SDL and V&V.

   Sommario/riassunto   This book constitutes the refereed papers of the proceedings of the 8th International Conference on System Analysis and Modeling, SAM 2014, held in Valencia, Spain, in September 2014. The 18 full papers and the 3 short papers presented together with 2 keynotes were carefully reviewed and selected from 71 submissions. The contributions are organized in topical sections named: reuse; availability, safety and

optimization; sequences and interactions; testing; metrics, constraints and repositories; and SDL and V&V.
