1. Record Nr.   UNISA996199683603316

   Titolo   Computational Logistics [[electronic resource]] : 5th International
                        Conference, ICCL 2014, Valparaíso, Chile, September 24-26, 2014,
                        Proceedings / / edited by Rosa G. González-Ramírez, Frederik Schulte,
                        Stefan Voß, Jose A. Ceroni Díaz

   Pubbl/distr/stampa   Cham : , : Springer International Publishing : , : Imprint : Springer, ,
                        2014

   ISBN   3-319-11421-2

   Edizione   [1st ed. 2014.]

   Descrizione fisica   1 online resource (XIV, 179 p. 38 illus.)

   Collana   Theoretical Computer Science and General Issues, , 2512-2029 ; ; 8760

   Disciplina   658.50285

   Soggetti   Algorithms
                        Application software
                        Software engineering
                        Artificial intelligence
                        Computer simulation
                        Information technology—Management
                        Computer and Information Systems Applications
                        Software Engineering
                        Artificial Intelligence
                        Computer Modelling
                        Computer Application in Administrative Data Processing

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Bibliographic Level Mode of Issuance: Monograph

   Nota di bibliografia   Includes bibliographical references and index.

   Nota di contenuto   Optimization of transport problems -- Container terminal applications
                        -- Simulation and environmental sustainability applications.

   Sommario/riassunto   This book constitutes the refereed proceedings of the 5th International
                        Conference on Computational Logistics, ICCL 2014, held in Valparaiso,
                        Chile, in September 2014. The 11 papers presented in this volume were
                        carefully reviewed and selected for inclusion in the book. They are
                        organized in topical sections entitled: optimization of transport
                        problems; container terminal applications; simulation and
                        environmental sustainability applications.
