Sommario/riassunto	The March 1996 workshop acknowledges the role of multimedia software in business, research, and development, while confronting the expensive and unpredictable challenges which immature tools and methods still present. 40 researchers extend their expertise to the problems at hand, specifically addressing the development and research in distributed multimedia applications (DMMA) across a range of intersection points such as architectures and building blocks, composition, and issues of interaction and security. Includes diagrams and computer code. Lacks an index. Annotation copyright by Book News, Inc., Portland, OR.
