

1. Record Nr.	UNISA996200347503316
Titolo	Computer Vision - ECCV 2014 Workshops [[electronic resource] ] : Zurich, Switzerland, September 6-7 and 12, 2014, Proceedings, Part III // edited by Lourdes Agapito, Michael M. Bronstein, Carsten Rother
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-16199-7
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (XXI, 860 p. 393 illus.)
Collana	Image Processing, Computer Vision, Pattern Recognition, and Graphics ; ; 8927
Disciplina	006.37
Soggetti	Optical data processing Pattern recognition Artificial intelligence Algorithms Computer graphics Application software Image Processing and Computer Vision Pattern Recognition Artificial Intelligence Algorithm Analysis and Problem Complexity Computer Graphics Information Systems Applications (incl. Internet)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Transferring and adapting source knowledge in computer vision -- Surveillance and re-identification -- Color and photometry in computer vision -- Assistive computer vision and robotics.
Sommario/riassunto	The four-volume set LNCS 8925, 8926, 8927 and 8928 comprises the thoroughly refereed post-workshop proceedings of the Workshops that took place in conjunction with the 13th European Conference on Computer Vision, ECCV 2014, held in Zurich, Switzerland, in September 2014. The 203 workshop papers were carefully reviewed and selected

for inclusion in the proceedings. They were presented at workshops with the following themes: where computer vision meets art; computer vision in vehicle technology; spontaneous facial behavior analysis; consumer depth cameras for computer vision; "chlearn" looking at people: pose, recovery, action/interaction, gesture recognition; video event categorization, tagging and retrieval towards big data; computer vision with local binary pattern variants; visual object tracking challenge; computer vision + ontology applies cross-disciplinary technologies; visual perception of affordance and functional visual primitives for scene analysis; graphical models in computer vision; light fields for computer vision; computer vision for road scene understanding and autonomous driving; soft biometrics; transferring and adapting source knowledge in computer vision; surveillance and re-identification; color and photometry in computer vision; assistive computer vision and robotics; computer vision problems in plant phenotyping; and non-rigid shape analysis and deformable image alignment. Additionally, a panel discussion on video segmentation is included.
