 Chapter 17: Canine Distemper

Sommario/riassunto

Blackwell's Five-Minute Veterinary Consult Clinical Companion: Canine and Feline Infectious Diseases and Parasitology, Second Edition takes a user-friendly alphabetical format to cover a wide spectrum of canine and feline infectious diseases and parasite-related disorders. Part of the popular Five-Minute Veterinary Consult series, it includes information on many specific organisms and diseases, from amebiasis and Ehrlichiosis to rabies and ticks. The text also provides extensive differential diagnostic lists, as well as information on drugs, dosages, toxicity, treatment options,

Preserving in Social Networks -- Securely Solving Classical Network Flow Problems -- Remote IP Protection Using Timing Channels -- Detecting Camouflaged Applications on Mobile Application Markets -- WrapDroid: Flexible and Fine-Grained Scheme Towards Regulating Behaviors of Android Apps -- A Collision Attack on a Double-Block-Length Compression Function Instantiated with Round-Reduced AES-256 -- LSH: A New Fast Secure Hash Function Family -- Lossless Data Hiding for Binary Document Images Using n-Pairs Pattern -- Montgomery Modular Multiplication on ARM-NEON Revisited -- A Fair and Efficient Mutual Private Set Intersection Protocol from a Two-Way Oblivious Pseudorandom Function -- Security Analysis of Polynomial Interpolation-Based Distributed Oblivious Transfer Protocols -- Compact and Efficient UC Commitments Under Atomic-Exchanges -- Issuer-Free Adaptive Oblivious Transfer with Access Policy -- Memory Address Side-Channel Analysis on Exponentiation -- Mutant Differential Fault Analysis of Trivium MDFA.

Sommario/riassunto

This book constitutes the thoroughly refereed post-conference proceedings of the 17th International Conference on Information Security and Cryptology, ICISC 2014, held in Seoul, South Korea in December 2014. The 27 revised full papers presented were carefully selected from 91 submissions during two rounds of reviewing. The papers provide the latest results in research, development and applications in the field of information security and cryptology. They are organized in topical sections on RSA security, digital signature, public key cryptography, block ciphers, network security, mobile security, hash functions, information hiding and efficiency, cryptographic protocol, and side-channel attacks.
