| Record Nr. | UNISA996200683003316 |
| Autore | Agrawl Rakesh |
| Titolo | 18th International Conference on Data Engineering: Proceedings 2002: San Jose, California |
| Pubbl/distr/stampa | [Place of publication not identified], : IEEE Computer Society Press, 2002 |
| Descrizione fisica | 1 online resource (xix, 735 pages) : illustrations |
| Disciplina | 005.74 |
| Soggetti | Database management |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Bibliographic Level Mode of Issuance: Monograph |
| Sommario/riassunto | Consists of 54 papers, 21 posters, and 16 product demonstrations presented during the February 2002 conference on engineering data, data management systems, and data-centric applications. The authors share their research in such areas as semistructured data and XML, middleware and metadata, data mining, and query processing. Example paper topics are detecting changes in XML documents, efficient temporal join processing using indices, integrating workflow management systems with B2B interaction standards, geometric similarity retrieval in large image bases, fast mining of massive tabular data via approximate distance computations, and improving range query estimation on histograms. No subject index. Annotation copyrighted by Book News Inc., Portland, OR. |
