1. Record Nr.	UNISA996201061803316
Autore	Baldi Pierre
Titolo	Modeling the Internet and the Web: Probabilistic Methods and Algorithms
Pubbl/distr/stampa	[Place of publication not identified], : John Wiley & Sons Incorporated, 2003
ISBN	1-280-55604-8
	9786610556045
	0-470-86799-X
Descrizione fisica	1 online resource (296 pages)
Disciplina	004.678
Soggetti	Internet - Mathematical models
	Telecommunication - Traffic - Mathematical models
	Probabilities
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	Despite its haphazard growth, the Web hides powerful underlying regularities - from the organization of its links to the patterns found in its use by millions of users. Probabilistic modelling allows many of these regularities to be predicted on the basis of theoretical models based on statistical methodology. Among these applications are data mining and bioinformatics. This text has been designed to fill a specific niche and covers the most important aspects of the Internet at the information level using a modern unified mathematical/probabilistic/graphical models/machine learning treatment. The book does not deal with the physical layer, or the protocol layer of the Internet. Rather, it focuses on the information and application layers, as well as some of the emerging properties of the Internet.

Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Front matter -- Contents -- I. Introduction -- Noun phrase structure: An und für sich, in time, and in space -- II. On inflection -- Nominal inflection galore: Daghestanian, with side glances at Europe and the world -- Inflectional morphology in the Hungarian noun phrase: A typological assessment -- The selective elaboration of nominal or pronominal inflection -- Types of typology, illustrated from gender systems -- III. On (over-)determination -- Double articulation -- Non-compositional definiteness marking in Hungarian noun phrases -- English goes Asian: Number and (in)definiteness in the Singlish noun phrase -- A woman of sin, a man of duty, and a hell of a mess: Non-determiner genitives in Swedish -- IV. On amplification -- The interaction between numerals and nouns -- Possessive noun phrases in the languages of Europe -- Action nominal constructions in the languages of Europe -- Noun phrase conjunction: The coordinative and the comitative strategy -- Backmatter
Sommario/riassunto	The result of over five years of close collaboration among an international group of leading typologists within the EUROTYP program, this volume is about the morphology and syntax of the noun phrase.

Particular attention is being paid to nominal inflectional categories and inflectional systems and to the syntax of determination, modification, and conjunction. Its areal focus, like that of other EUROTYP volumes, is on the languages of Europe; but in order to appreciate what is peculiarly European about their noun phrases, a more comprehensive and genuinely typological view is being taken at the
