Lloyd -- Methodology / Teun Tielemans -- Logic / Ben Morison -- Language / Ben Morison -- Epistemology / R.J. Hankinson -- Psychology / Pierluigi Donini -- Philosophy of nature / R. J. Hankinson -- Anatomy / Julius Rocca -- Physiology / Armelle Debru -- Therapeutics / Philip van der Eijk -- Pharmacology / Sabine Vogt -- Commentary / Rebecca Flemming -- The fortunes of Galen / Vivian Nutton.
Sommario/riassunto	Galen of Pergamum (AD 129-c.216) was the most influential doctor of later antiquity, whose work was to influence medical theory and practice for more than fifteen hundred years. He was a prolific writer on anatomy, physiology, diagnosis and prognosis, pulse-doctrine, pharmacology, therapeutics, and the theory of medicine; but he also wrote extensively on philosophical topics, making original contributions to logic and the philosophy of science, and outlining a scientific epistemology which married a deep respect for empirical adequacy with a commitment to rigorous rational exposition and demonstration. He was also a vigorous polemicist, deeply involved in the doctrinal disputes among the medical schools of his day. This volume offers an introduction to and overview of Galen's achievement in all these fields, while seeking also to evaluate that achievement in

the light of the advances made in Galen scholarship over the past thirty years.
