## Sommario/riassunto

While poetry has been the genre most closely associated with the Romantic period, the novel of the late eighteenth and early nineteenth centuries has attracted many more readers and students in recent years. Its canon has been widened to include less well known authors alongside Jane Austen, Walter Scott, Maria Edgeworth and Thomas Love Peacock. Over the last generation, especially, a remarkable range of popular works from the period have been re-discovered and reread intensively. This Companion offers an overview of British fiction written between roughly the mid-1760s and the early 1830s and is an ideal guide to the major authors, historical and cultural contexts, and later critical reception. The contributors to this volume represent the most up-to-date directions in scholarship, charting the ways in which the period's social, political and intellectual redefinitions created new fictional subjects, forms and audiences.

Sommario/riassunto	This study reviews policy developments in recent years and, in the light of that, explores ways in which further consensus might be reached among WTO members to reduce farm trade distortions - and thereby also progress the multilateral trade reform agenda. Particular attention is given to ways that would boost well-being in developing countries, especially for those food-insecure households still suffering from poverty and hunger.
