Products; Index

Sommario/riassunto

This standard work for practising dietitians and students has been revised to reflect the growing importance of nutritional support in many paediatric conditions and the numerous advances which have occurred since the first edition was published in 1994. Fully comprehensive and covering all disorders of the body systems relating to nutrition, it includes enteral and parenteral feeding, the nutrition and feeding of premature infants, diseases of organ systems, lipid disorders, nutrition for children with feeding difficulties, burns, obesity and failure to thrive. The second edition has exp
