

1. Record Nr.	UNISA996201972803316
Autore	Chen Jian
Titolo	Technology of Object-Oriented Languages and Systems: Proceedings Conference Nanjing, P. R. China 1999
Pubbl/distr/stampa	[Place of publication not identified], : IEEE Computer Society Press, 1999
Descrizione fisica	1 online resource (493 pages)
Disciplina	005.117
Soggetti	Object-oriented programming (Computer science) - Congresses
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	The 62 reproduced typescripts, several double spaced, cover general topics, analysis and modelling, software development, distributed and concurrent systems, database systems and applications, and applications and experiences. The specific topics include typing communicating sequential processes, extended formal specifications to object-oriented models through level-view structured schemas, a multi-layered system of metrics for measuring reuse by inheritance, an algorithm for describing object-oriented software architecture using graphs, supporting distributed software development processes in a Web-based environment, building a repository for workflow systems, efficiently computing frequent tree-like topology patterns in a Web environment, and a personal intelligent navigation system based on Java. Only the authors are indexed. Annotation copyrighted by Book News, Inc., Portland, OR.
