

1. Record Nr.	UNISA996202076903316
Titolo	Immunology of the gut
Pubbl/distr/stampa	Amsterdam ; ; New York, : Elsevier/Excerpta Medica/North-Holland, 1977
ISBN	0-444-15246-6 1-280-78359-1 9786613693983 0-470-72028-X 0-470-71796-3
Descrizione fisica	1 online resource (viii, 376 pages) : illustrations
Collana	Ciba Foundation symposium (new series) ; ; 46
Altri autori (Persone)	HeremansJ. F (Joseph F.)
Disciplina	616.3/4/079
Soggetti	Immunologic diseases Immunoglobulin A Intestines Immune response
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Symposium on Immunology of the Gut, held at the Ciba Foundation, London, 26th-28th April 1976"--Participants page. "In memory of the late Joseph Heremans."
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Immunology of the Gut; Contents; Introduction; The secretory IgA system of the gut; Discussion; The natural history of the cells producing IgA in the gut; Discussion; Significance of immune mechanisms in relation to enteric infections of the gastrointestinal tract in animals; Discussion; Intestinal secretion of IgA and IgM: a hypothetical model; Discussion; Antibodies in human serum and milk induced enterobacteria and food proteins; Discussion; Immunological responses to bacterial plaque in the mouth; Discussion Sites of synthesis and localization of IgE in rats infested with <i>Nippostrongylus brasiliensis</i> ; Discussion; The immunological consequences of nematode infection; Discussion; Role of the eosinophil; Discussion; Genetic and nutritional variations in antigen handling and disease; Discussion; Gastrointestinal complications of immunodeficiency syndromes; Discussion; Immunobiology and

pathogenesis of alpha chain disease; Discussion; Immunological studies in inflammatory bowel disease; Discussion; Effects of local delayed hypersensitivity on the small intestine; Discussion Immunopathology of coeliac disease; Discussion; General discussion; Homing of T blasts; The induction of tolerance to orally administered antigens; Immunization with *Escherichia coli* hybrids; Antigen entry in gut; The intestinal bacterial load; Gut not a primary lymphoid organ; Future work; Index of contributors; Subject index
