Since 2007, the Belgian School at Athens has undertaken excavations on the Kefali or Buffo hill, east of the village of Sissi, on the north coast of Crete where a Minoan site was occupied approximately between 2500 and 1200 BC. This volume is the follow-up of an earlier one on the 2007-2008 excavations (published as Aegis 1) and presents a preliminary report on the excavations carried out in 2009 and 2010. It concentrates on the different zones examined within the cemetery and settlement. There are also reports on the Late Minoan pottery, site conservation and environmental analysis as well as a paper on the use of GIS at Sissi.

Note generali

Description based upon print version of record.

Nota di bibliografia

Includes bibliographical references and index.

Nota di contenuto

The healthy heart -- The conduction system -- Indications for pacing -- The history of pacing -- Implantable device codes -- Pacemaker technology -- Lead technology -- Implant techniques -- Single-chamber pacing -- Dual-chamber pacing -- Basic paced ECG interpretation -- Rate-responsive pacing -- Special features -- Systematic follow-up -- Troubleshooting and diagnostics.

Sommario/riassunto

There are millions of pacemaker patients in the world and this number is increasing. It is not unusual for these patients to be cared for by clinicians with no formal training in cardiac rhythm management devices. While there are many excellent pacing and defibrillation books, they are nearly all written by physicians for physicians. The Nuts and Bolts of Cardiac Pacing is written specifically for non-cardiologists in a lively, intelligent and easy to follow style. It emphasizes real-life clinical practice and practical tips, including illustrations from actual clinical cases.
