

1. Record Nr.	UNISA996202847603316
Titolo	Proceedings of the 44th Conference on Glass Problems [[electronic resource]] : a collection of papers ... November 15-16, 1983, University of Illinois at Urbana-Champaign, Illini Union Building, Urbana, IL / / Subhash H. Risbud and Clifton G. Bergeron, editors
Pubbl/distr/stampa	Columbus, OH, : American Ceramic Society, c1984
ISBN	1-282-31449-1 9786612314490 0-470-32019-2 0-470-32054-0
Descrizione fisica	1 online resource (170 p.)
Collana	Ceramic engineering and science proceedings ; ; 5/1-2
Altri autori (Persone)	RisbudSubhash H BergeronClifton G
Disciplina	666
Soggetti	Glass Glass manufacture
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographies.
Nota di contenuto	Proceedings of the 44th Conference on Glass Problems; Table of Contents; Trends in the Flat Glass Industry.; Recent Developments in Forehearth Design and Operation; Molybdenum-Lined Electric Glassmelting; Chimney-Type Checker-Block Packing and Latest Developments in Checkerwork Design; Factors To Consider When Specifying Forehearth Temperature Control Systems; Use of Aerodynamic Means To Improve Regenerator Efficiency and Control of Combustion Air Input at Ports; End-Port Charging-A Close Look at an Old Problem; An Electric Furnace for Nuclear Waste Glass Use of High Iron Sand in Flint Container GlassElectric Melting System Update; Functional Development of Glassmelting Processes via Modeling; Computer Simulations of the Energy-Related Behavior of Electrically Boosted Glass Furnaces; Evaluation of NOx Emission on a Pilot-Scale Furnace.; Glass Packaging Trends
Sommario/riassunto	This volume is part of the Ceramic Engineering and Science Proceeding (CESP) series. This series contains a collection of papers dealing with

issues in both traditional ceramics (i.e., glass, whitewares, refractories, and porcelain enamel) and advanced ceramics. Topics covered in the area of advanced ceramic include bioceramics, nanomaterials, composites, solid oxide fuel cells, mechanical properties and structural design, advanced ceramic coatings, ceramic armor, porous ceramics, and more.
