Testing for sequences and reversals on Bitcoin series -- 20. CHAID algorithm applied in a post-rating to business-risk insurance contracts.

Sommario/riassunto

This volume presents new empirical methods and applications in economics with special interest in advances in empirical macroeconomics, microeconomics, financial economics, international economics, and agricultural economics. Featuring selected contributions from the 2022 International Conference of Applied Economics (ICOAE 2021), this book provides country specific studies with potential applications in economic policy. It is beneficial to researchers, scholars, academics and policy makers in quantitative economic research (in both methods and applications).
