

1. Record Nr.	UNISA996203171703316
Titolo	Materials for transportation technology
Pubbl/distr/stampa	[Place of publication not identified], : Deutsche Gesellschaft für Materialkunde, 2000
ISBN	1-280-55806-7 9786610558063 3-527-60602-5
Descrizione fisica	1 online resource (378 pages)
Collana	EUROMAT 99 Materials for transportation technology
Disciplina	629.2/32
Soggetti	Motor vehicles - Materials Space vehicles - Materials Automotive Engineering Mechanical Engineering Engineering & Applied Sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	Light design, high safety and comfort, and environmental compatibility are the requirements which influence the use of materials in automobiles. In the aerospace industry today, it is necessary to substantially reduce development time and costs. Rail vehicles and ships are characterized by extremely long lifetime and high mileages. The achievement of these different objectives depends on the availability of novel or improved materials and related processes. This text looks into these issues.
