

1. Record Nr.	UNISA996203501303316
Titolo	Horticulture research
Pubbl/distr/stampa	London, : Nature Publishing Group in partnership with Nanjing Agricultural University Oxford : , : Oxford University Press
ISSN	2052-7276
Descrizione fisica	1 online resource
Soggetti	Horticulture Plants, Genetically Modified Genetic Phenomena Genomics Horticultura Periodical Periodicals. Revistes electròniques.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Refereed/Peer-reviewed Published online only.
Sommario/riassunto	Horticulture Research is an online only, open-access international journal devoted to publish original research results and reviews on, but not limited to, genetics, genomics and breeding, biotechnology, biochemistry, physiology, cellular and molecular biology, evolution, and environmental biology of horticultural plants. The journal is published by Nature Publishing Group in partnership with Nanjing Agricultural University. The journal also publishes News and Views on current events and hot topics in global horticultural fields. The journal aims to become a highly respected and trusted resource of cutting-edge information in the field of horticulture. The journal will also provide a much-needed platform to promote worldwide academic exchange.-- Journal website (About), viewed December 16, 2014.

Horticulture Research is a new Open Access, fully peer-reviewed journal which will publish the best and most interesting research focusing on all major horticultural crops from around the world. The Journal will cover basic and fundamental research on, but not limited to, genetics, genomics and breeding, biotechnology, biochemistry, physiology, cellular and molecular biology, evolution, and environmental biology of horticultural plants. The journal also publishes News and Views on current events and hot topics in global horticultural fields.-- NPG website, viewed November 22, 2013.
