Sommario/riassunto	This e-book gathers the extended and updated versions of 8 papers selected among 58 from the IMS 2004 international conference, which was held in Troyes, France, in July 2004. They introduce some original approaches and new results that thrust to a real-world predictive maintenance application. This e-book also aims at promoting the development of intelligent and efficient maintenance systems, to reach failure risks closer to zero. The selected papers offer methods enabling a satisfactory operational availability of machineries, through the monitoring, the diagnosis, the forecasting and the de

Sommario/riassunto

The title to this interdisciplinary collection draws on the Yupik Eskimo belief that seals, fish, and other game are precious gifts that, when treated with respect and care, will return to be hunted again. Just so, if oral traditions are told faithfully and respectfully, they will return to benefit future generations. The contributors to this volume are concerned with the interpretation and representation of oral narrative and how it is shaped by its audience and the time, place, and cultural context of the narration. Thus, oral traditions are understood as a series of dialogue
