Sommario/riassunto

This book presents accounts of creative processes and contextual issues of current-day and early-twentieth-century women composers. This collection of essays balances narratives of struggle, artistic prowess, and of "breaking through" the obstacles in the profession. Part I: Creative Work – Then and Now illuminates historical and present-day women's composition and various iterations and conceptions of the "feminine voice"; Part II: The State of the Industry in the Present Day provides solutions from the frontline to sector inequities; and Part III: Creating; Collaborating: Composer and Performer Reflections offers personal stories of current creation in music. A Century of Composition by Women: Music Against the Odds draws together topical issues in feminist musicology over the past century.
