

1. Record Nr.	UNISA996204928103316
Titolo	Cement & concrete composites [[e-journal]]
Pubbl/distr/stampa	[Barking, Essex], : Elsevier, 1990-
ISSN	1873-393X
Soggetti	Composite-reinforced concrete Cement composites Concrete Composite materials Lightweight concrete Periodicals.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Title from pdf of cover (ScienceDirect, viewed Oct. 17, 2005). Place of publication varies. Some issues also have distinctive theme titles. Refereed/Peer-reviewed
Sommario/riassunto	"This journal is designed to reflect current developments and advances being made in the general field of cement-concrete composites technology and in the production, use, and performance of cement-based construction materials in general. The word cement is interpreted here in a wide sense to include not only Portland cement but also other matrices such as composite cements, resins, polymers and sulphur. The journal will therefore cover a wide range of composite materials such as fibre cement/concrete composites, polymer cement composites, polymer impregnated composites ferrocement resin concretes, lightweight, wood composites, use of waste material, composite cements, adhesion bonding and fibre reinforced plastics as applied to construction, and material and structural composite systems."
