Front Cover; Psychological Criminology; Copyright Page; Contents; List of illustrations; Acknowledgements; 1. Introduction; What is psychological criminology?; Defining crime and criminals; Debates about the nature of crime and criminality; Psychological theories of crime and criminality: an integrated model; 2. Human nature; The principles of evolution; Evolution and behaviour; Crime-focused evolutionary approaches; Offender-focused evolutionary approaches; Conclusion and evaluation; 3. Heredity; A primer in behavioural genetics; Heritability of criminality Variations in the heritability of criminality Beyond behavioural genetics: molecular genetics; Conclusion and evaluation; 4. The brain; Basic brain structures and functions; Psychophysiology and crime; Biochemistry and crime; Neuroanatomy and crime; Neuro-environmental factors and crime; Putting it together: neuropsychological theories of crime; Conclusion and evaluation; 5. Personality; Trait approaches to personality; The single-trait approach and crime; The super-trait approach: Eysenck's three-factor theory of crime; Antisocial personality disorder (APD); Conclusion and evaluation 6. Development The biological and environmental foundations of human development; Developmental risk and protective factors for crime; Psychosocial development and crime; Criminal careers; Conclusion and evaluation; 7. Learning; The science of behaviour; Classical conditioning; Operant conditioning; Social learning; Conclusion and evaluation; 8. Cognition; The cognitive revolution; Social cognitive theory; Offender decision-making; Schemas and scripts; Conclusion and evaluation; 9. Situations; What is a situation?; Social psychology; Environmental psychology; Opportunity theories The person-situation interaction (again) Conclusion and evaluation; 10. Conclusion; The argument in a nutshell; The strengths and limits of integration; Implications for practice; Bibliography; Index

Sommario/riassunto

Psychological Criminology addresses the question: what is it about individuals and their experiences that cause them to commit crime and/or to become criminal? This book provides a comprehensive coverage of psychological theories of crime and criminality, exploring theories focusing on factors present at birth (human nature, heredity); theories that focus on factors that influence the offender over the lifespan (learning, development); and theories focusing on factors present at the crime scene. It emphasizes the connections among the different approaches, and demonstrates how, taken together rather than as rival explanations, they provide a more complete picture of crime and criminality than each provides individually. Theories are arranged throughout the book in a temporal sequence, from distal to proximal causes of crime. The analysis spans 100,000 years, from the evolutionary roots of criminal behaviour in the ancestral environments of early humans on the African savanna, to the decision to engage in a specific criminal act. Key features of the book include: a focus on theory – 'explaining' crime and criminality, an integrative approach, accessible to readers who do not have a background in psychology. Psychological Criminology highlights the contributions that psychological theory can make to the broader field of criminology; it will be of interest to students, academics, researchers and practitioners in both criminology and forensic psychology.

3. Record Nr.	UNINA9910778607803321
Titolo	Classifying drinking water contaminants [[electronic resource]] : for regulatory consideration / / Committee on Drinking Water Contaminants, Water Science and Technology Board, Board on Environmental Studies and Toxicology, Division on Earth and Life Studies, National Research Council
