Sommario/riassunto	"Automation in construction is an international journal for the publication of original research papers. The journal publishes refereed material on all aspects pertaining to the use of information technologies in architecture, engineering, construction technologies, and maintenance and management of constructed facilities. The scope of Automation in construction is broad, encompassing all stages of the construction life cycle from the initial design and architecture, through to the actual construction of the facility, its maintenance and control as well as the eventual dismantling of buildings and engineering structures.
