Titolo	Modeling the ionosphere-thermosphere system / / Joseph Huba, Robert Schunk, George Khazanov, editors
Pubbl/distr/stampa	Washington, District of Columbia : , : American Geophysical Union, , 2014 ©2014
ISBN	1-118-70445-2 1-118-70441-X 1-118-70421-5
Descrizione fisica	1 online resource (350 p.)
Collana	Geophysical Monograph Series, , 0065-8448 ; ; 201
Disciplina	551.51
Soggetti	Ionosphere - Mathematical models Thermosphere - Mathematical models Atmospheric thermodynamics Dynamic meteorology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Modeling the Ionosphere- Thermosphere System; Copyright; Contents; Preface; Introduction; Section I: Physical Processes; Ionosphere- Thermosphere Physics: Current Status and Problems; 1.INTRODUCTION; 2.MISSING PHYSICS IN GLOBAL PHYSICS-BASED IONOSPHERE-THERMOSPHERE MODELS; 3.SUMMARY; REFERENCES; Physical Characteristics and Modeling of Earth's Thermosphere; 1. Sommario/riassunto

Published by the American Geophysical Union as part of the Geophysical Monograph Series, Volume 201. Modeling the Ionosphere-Thermosphere System brings together for the first time a detailed description of the physics of the IT system in conjunction with numerical techniques to solve the complex system of equations that describe the system, as well as issues of current interest. Volume highlights include discussions of: Physics of the ionosphere and thermosphere IT system, and the numerical methods to solve the basic equations of the IT system The physics and
