Sommario/riassunto

The theme of this meeting was the management of technologies in the context of developing countries, and in the light of recent developments concerning especially open source software and applications. Speakers from various countries debated in English and in French over the importance of changing the rules concerning library management systems, as well as related implications. Results show that open source software might be a solution, although some conditions apply. Réunis sous le thème de la gestion des systèmes automatisés de bibliothèques dans les pays en développement, conférenciers et participants discutèrent des changements récents dans ce domaine, notamment de l'apport des logiciels à code source ouvert. Les conférenciers, provenant de différents pays, présentèrent en anglais et en français leurs différents points de vue et expériences sur cette question importante pour l'avenir, de même que sur les implications qui y sont liées. Les résultats démontrent que les logiciels à code source ouverts peuvent être une solution, mais à certaines conditions.

Sommario/riassunto	The proceedings of the Eighteenth ICMSEM cover a wide range of areas including hot management issues in Engineering Science. It provides newest and frontier ideas and research achievements in the area of

Management Science and Engineering Management to researchers and practitioners. The work contains both theoretical and practical studies of Management Science in the Computing Methodology, showing the advanced management concepts, computing technologies for decision making problems with large, uncertain and unstructured data. Research in this proceeding will show the new changes and challenges in the decision-making procedure as we have entered the big data era. Theoretical studies of this proceedings will present the new technologies of analysis, capture, search, sharing, storage, transfer, visualization, and privacy violations, as well as advances in integration of optimization, statistics and data mining. This proceeding also contains practical studies in the real decision-making scenarios when facing large, uncertain or unstructured data. The readers who are interested in related fields of can benefit from the proceedings for the new ideas and research direction.
