Its presence and absence in British Psychology Racism at bay: Psychology and 'race' 1945-69 Race and IQ 1969-96: An undead controversy; Bringing it all back home; Resume; Appendix: Comments on J.P.Rushton's table of 'Mongoloid', 'Caucasoid', 'Negroid' rankings; Bibliography; T.R.Garth bibliography; Name index; Subject index
Sommario/riassunto	Topics with racial implications have been hotly debated in the psychological literature for most of this century and are often in the news. Graham Richards takes a historical look at how the concepts of

"race" and "racism" emerged within the discipline and charts the underlying premises of some famous studies in their social and political contexts. No-one is allowed to be objective in this arena, as opponents will always argue that they are not. This account is bound therefore to be controversial and excite interest whether or not readers agree with Richards' stance.
