Soggetti	Earth & Environmental Sciences Environmental Sciences
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Problems of responsibility for the preservation of the environment and the protection of nature lead to questions of wholesomeness for people. In addition to the disciplinary approaches of the experts, a practical "mixed solution" is to be striven for, which safeguards nature conservation and "humane" living conditions that are beneficial for people, also for future generations. In terms of a pragmatic design, environmental compatibility and human friendliness should determine our future responsibilities.
