

1. Record Nr.	UNISA996208187303316
Titolo	Russian journal of genetics Applied research
Pubbl/distr/stampa	Moscow, : MAIK Nauka/Interperiodica Publ. New York, : Distributed by Springer
ISSN	2079-0600
Disciplina	576.5
Soggetti	Genetics Periodicals.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Refereed/Peer-reviewed
Sommario/riassunto	Russian Journal of Genetics: Applied Research contains translations of papers selected from two leading Russian journals - Vavilovskii Zhurnal Genetiki I Seleksii (Vavilov Journal of Genetics and Breeding) and Ekologicheskaya genetika (Ecological Genetics). The main topics of the journal are: cell biology, cytogenetics, molecular biology, developmental genetics; plant, animal and human genetics; population and evolutionary genetics; microbial, plant and animal biotechnology; bioinformatics and systems biology. The journal also considers all aspects of ecological genetics including behavioral genetics, human ecological genetics, environmental and genetic toxicology, emerging diseases, mutagenesis and carcinogenesis, simbiogenetics, aging, genetic models in ecology.
