Titolo	Knowledge management in construction [[electronic resource] /] / edited by Chimay J. Anumba, Charles O. Egbu, and Patricia M. Carrillo ; foreword by Michael Latham
Pubbl/distr/stampa	Oxford ; ; Malden, MA, : Blackwell Pub., 2005
ISBN	1-281-32152-4 9786611321529 0-470-75955-0 0-470-75952-6
Edizione	[1st ed.]
Descrizione fisica	1 online resource (242 p.)
Altri autori (Persone)	AnumbaC. J (Chimay J.) EgbuCharles O CarrilloPatricia M
Disciplina	690
Soggetti	Construction industry - Information services
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Knowledge Management in Construction; Contents; Foreword; Preface; Acknowledgements; Contributors; 1 Introduction; 2 The Nature and Dimensions of Knowledge Management; 2.1 Introduction; 2.2 Why knowledge management now ? The drivers; 2.3 The nature of knowledge; 2.4 Extra-organisational knowledge and absorptive capacity; 2.5 Key knowledge processes; 2.6 Conclusions; References; 3 Construction as a Knowledge-Based Industry; 3.1 Introduction; 3.2 The construction industry and knowledge-intensive products and services; 3.3 Knowledge production in construction 3.4 Communicating and sharing knowledge3.5 Creating and sustaining a knowledge culture; 3.6 Conclusions; References; 4 Strategies and Business Case for Knowledge Management; 4.1 Introduction; 4.2 What does knowledge management mean to construction?; 4.3 What knowledge management strategy should be adopted?; 4.4 Delivering knowledge management in practice; 4.5 A business case for knowledge management; 4.6 The future; References; References; 5 Organisational Readiness for Knowledge Management; 5.1 Introduction; 5.2 The

importance of knowledge lifecycle management (KLM)

5.3 Preparing the organisational context for knowledge lifecycle

management5.4 Conclusions; References; 6 Tools and Techniques for

Knowledge Management; 6.1 Introduction; 6.2 Knowledge management

tools; 6.3 Selecting knowledge management tools; 6.4 The SeLEKT

approach; 6.5 Conclusions; 7 Cross-Project Knowledge Management;

7.1 Introduction; 7.2 The nature of projects; 7.3 Construction projects;

7.4 Cross-project knowledge transfer; 7.5 Live capture and reuse of

project knowledge; 7.6 Conclusions; References; 8 Knowledge

Management as a Driver for Innovation; 8.1 Introduction

8.2 Knowledge management and innovations: building and maintaining

capabilities8.3 Knowledge management and improved innovations:

issues of strategy, process, structure, culture and technology; 8.4

Managing knowledge for exploiting innovations: implications for

managers; 8.5 Conclusions; References; 9 Performance Measurement in

Knowledge Management; 9.1 Introduction; 9.2 Why measure the

performance of knowledge management and knowledge assets?; 9.3

Types of performance measures; 9.4 Measurement approaches; 9.5

Application tools; 9.6 Conclusions; References

10 Knowledge Management Strategy Development: A CLEVER

Approach10.1 Introduction; 10.2 The CLEVER project; 10.3 The CLEVER

framework; 10.4 Utilisation and evaluation of the framework; 10.5

Conclusions; References; 11 Corporate Memory; 11.1 Introduction;

11.2 Research methodology; 11.3 Related research; 11.4 Tacit

knowledge capture, sharing and reuse; 11.5 Tacit and explicit

knowledge capture, sharing and reuse; 11.6 Conclusions; References;

12 Building a Knowledge-Sharing Culture in Construction Project

Teams; 12.1 Introduction; 12.2 Case study; 12.3 Discussion; 12.4

Conclusions; References

13 Concluding Notes

Sommario/riassunto

A key problem facing the construction industry is that all work is done by transient project teams, and in the past there has been no structured approach to learning from projects once they are completed. Now, though, the industry is adapting concepts of knowledge management to improve the situation. This book brings together 13 contributors from research and industry to show how managing construction knowledge can bring real benefits to organisations and projects. It covers a wide range of issues, from basic definitions and fundamental concepts, to the role of information technology, and en

Nota di contenuto	Chapter 1. Introduction. The Role of Prevention in Comprehensive Trauma Care Systems -- Chapter 2. History and Development of Hospital-based Injury Prevention -- Chapter 3. Public Health Fundamentals for Hospital-based Programs -- Chapter 4. Developing Data-Driven Programs: The value of data -- Chapter 5. Ensuring an Evidence Based Approach to Injury Prevention Interventions -- Chapter 6. Building Prevention Capacity through Community Partnership -- Chapter 7. Addressing Cultural Competence in Hospital Based Programs -- Chapter 8. Conducting Research in Community Injury Prevention -- Chapter 9. Understanding the Role of Advocacy -- Chapter 10. Making the Business Case for Hospital-based Injury and Violence Prevention Programs -- Chapter 11. Resources for Hospital-

Sommario/riassunto

This book offers the first comprehensive insight into hospital-based injury and violence prevention programs and describes a public health approach for the integration of population-based injury prevention into trauma centers. This book meets the need for a public health informed approach, as a majority of hospital-based injury and violence prevention programs are positioned within hospital systems driven by patient-centered, acute care models. Significant variability in administration, staffing and reimbursement structures across trauma centers has historically hindered standardization of injury prevention program structure and the role of the injury prevention professional. Topics in the book include the history and development of hospital-based programs, the need and process for developing data-driven and evidence-based injury prevention interventions, building trauma center capacity for outreach through partnerships, developing prevention efforts using trauma-informed care approach, community based research and program evaluation, and the role of advocacy in injury and violence prevention. The multidisciplinary team of authors offers a collaborative approach to the implementation and development of Hospital-based Injury and Violence Prevention Programs which will serve acute care nurses, trauma program managers, hospital administrators, trauma surgeons, hospital-based injury prevention professionals, and local public health professionals.
