

1. Record Nr.	UNISA996208604703316
Titolo	Computer Vision -- ACCV 2014 [[electronic resource]] : 12th Asian Conference on Computer Vision, Singapore, Singapore, November 1-5, 2014, Revised Selected Papers, Part I // edited by Daniel Cremers, Ian Reid, Hideo Saito, Ming-Hsuan Yang
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-16865-7
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (XX, 727 p. 293 illus.)
Collana	Image Processing, Computer Vision, Pattern Recognition, and Graphics ; ; 9003
Disciplina	004
Soggetti	Optical data processing Pattern recognition Artificial intelligence Health informatics Application software Information storage and retrieval Image Processing and Computer Vision Pattern Recognition Artificial Intelligence Health Informatics Information Systems Applications (incl. Internet) Information Storage and Retrieval
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Intro -- Preface -- Organization -- Contents - Part I -- Recognition -- Deep Representations to Model User `Likes' -- 1 Introduction -- 2 Semantic Feature Representation -- 3 Proposed Approach -- 3.1 User-Specific Feature Selection -- 3.2 Learning Deep Bimodal Feature Representation -- 4 Experiments -- 4.1 Dataset -- 4.2 Results and Analysis -- 5 Conclusion -- References -- Submodular Reranking with Multiple Feature Modalities for Image Retrieval -- 1 Introduction -- 2 Related Works -- 3 Submodular Reranking -- 3.1 Preliminaries -- 3.2

Information Gain with Graphical Models -- 3.3 Relative Ranking
Consistency -- 3.4 Optimization -- 4 Experiments -- 4.1 Experimental
Setting -- 4.2 Results Comparisons -- 4.3 Parameter Analysis -- 5
Conclusions -- References -- Accurate Scene Text Recognition Based
on Recurrent Neural Network -- 1 Introduction -- 2 Related Work --
2.1 Scene Text Recognition -- 2.2 Recurrent Neural Network -- 3
Feature Preparation -- 4 Recurrent Neural Network Construction -- 5
Word Scoring with Lexicon -- 6 Experiments and Discussion -- 6.1
System Details -- 6.2 Experiments on ICDAR and SVT Datasets -- 6.3
Discussion -- 7 Conclusion -- References -- Massive City-Scale
Surface Condition Analysis Using Ground and Aerial Imagery -- 1
Introduction -- 2 Related Work -- 3 Large-Scale Estimation of Land
Surface Condition -- 3.1 Debris Detection -- 3.2 Projection of Debris
Probabilities onto the Ground -- 3.3 Integration Using Gaussian
Process Regression -- 4 Experimental Results -- 4.1 Our Data -- 4.2
Ablative Analysis -- 4.3 Extensions to City-Scale Vegetation Estimation
-- 5 Conclusion -- References -- Can Visual Recognition Benefit from
Auxiliary Information in Training? -- 1 Introduction -- 2 Related Work
-- 3 A Latent Space Model: Addressing Missing-View-in-Test-Data --
4 DCCA: Formulation -- 5 DCCA: Solution -- 6 Experiments.
6.1 Compared Methods and Datasets -- 6.2 NYU-Depth-V1-Indoor
Scene Dataset -- 6.3 RGBD Object Dataset -- 6.4 Multi-Spectral Scene
Dataset -- 6.5 Discussion -- 7 Conclusions -- References -- Low Rank
Representation on Grassmann Manifolds -- 1 Introduction -- 2 LRR on
Grassmann Manifold -- 2.1 Low-Rank Representation (LRR) -- 2.2 LRR
on Grassmann Manifolds -- 3 Solution to LRR on Grassmann Manifold
-- 4 Experiments -- 4.1 Data Preparation and Experiment Settings --
4.2 MNIST Handwritten Digits Clustering -- 4.3 Dynamic Texture
Clustering -- 5 Conclusion and Future Work -- References -- Poster
Session 1 -- Learning Detectors Quickly with Stationary Statistics -- 1
Introduction -- 2 Background -- 2.1 Linear Discriminant Analysis with
Stationarity -- 2.2 Correlation Filters -- 2.3 Related Work -- 3 Fast
Estimation of the Toeplitz Covariance -- 4 From Toeplitz to Circulant
-- 5 Multi-channel, Two-Dimensional Signals -- 5.1 Toeplitz
Covariance Matrix -- 5.2 Circulant Covariance Matrix -- 5.3 From
Toeplitz to Circulant -- 6 Solving Toeplitz Systems -- 6.1 Direct
Methods -- 6.2 Iterative Methods -- 6.3 An Effective Heuristic -- 7
Empirical Study -- 7.1 Detection Performance -- 7.2 Time and Memory
-- 8 Conclusion -- References -- Age Estimation Based on
Complexity-Aware Features -- 1 Introduction -- 2 Related Work -- 3
Features Used for Face Description -- 3.1 Gradient Features -- 3.2
Gabor Filters -- 4 Learning the Features Using Realadaboost with
Complexity Penalty Terms -- 5 Experiments -- 5.1 Experiments Setup
-- 5.2 Experimental Results -- 5.3 Analysis -- 6 Conclusion --
References -- Efficient On-the-fly Category Retrieval Using ConvNets
and GPUs -- 1 Introduction -- 2 Evaluating Large-Scale Object
Category Retrieval -- 2.1 Evaluation Protocol -- 2.2 Experimental
Scenarios -- 3 Retrieval Performance over Image Representations --
3.1 Results and Analysis.
3.2 Implementation Details -- 4 On-the-fly Architecture -- 4.1 System
Performance -- 5 Conclusion -- References -- A Latent Clothing
Attribute Approach for Human Pose Estimation -- 1 Introduction -- 2
Related Work -- 3 HPE with Latent Clothing Attributes -- 3.1 Feature
Representation -- 3.2 Structured Learning with Latent SVM -- 3.3
Inference -- 4 Experiments -- 4.1 Datasets -- 4.2 Baselines and Metric
-- 4.3 Results -- 5 Conclusion -- References -- NOKMeans: Non-
Orthogonal K-means Hashing -- 1 Introduction -- 2 Background --
2.1 Notation -- 2.2 Related Work -- 3 Proposed Algorithm -- 3.1

Formulation -- 3.2 Computational Complexity -- 3.3 Discussion -- 4 Experiments -- 4.1 Performance Measurements -- 4.2 Parameter Selection -- 4.3 Results -- 5 Conclusion -- References -- Visual Vocabulary with a Semantic Twist -- 1 Introduction -- 2 Semantic Vocabulary for Object Retrieval -- 2.1 Semantic Vocabulary -- 2.2 Matching Patches: SemanticSIFT -- 2.3 Product Vocabulary and Speedup -- 2.4 Reduction in Memory Requirements -- 2.5 Accounting for Segmentation Uncertainty -- 2.6 Challenges -- 3 Fast Semantic Segmentation -- 3.1 Soft Segments -- 3.2 Labelling -- 3.3 Segmentation Results -- 4 Experimental Setup and Retrieval Results -- 4.1 Evaluation, Datasets and Baseline -- 4.2 Retrieval Results -- 5 Conclusions and Future Work -- References -- Context Based Re-ranking for Object Retrieval -- 1 Introduction -- 2 Related Work -- 3 Context Generation -- 3.1 Random Space Partition -- 3.2 Expansion of Contexts -- 4 Context Based Re-ranking -- 4.1 Computing the Context Factor for Re-ranking -- 5 Experimental Results -- 5.1 Experimental Setup -- 5.2 Evaluation of Random Space Partition -- 5.3 Effects of Context Expansion -- 5.4 Evaluation of Context Re-ranking -- 5.5 Comparison to State-of-the-Art -- 6 Conclusion -- References.

Adaptive Structural Model for Video Based Pedestrian Detection -- 1 Introduction -- 2 Related Work -- 3 Preliminaries -- 3.1 Bilinear DPM -- 3.2 Cost-Flow Based Data Association -- 4 Adaptive Structural Model -- 4.1 Adaptive DPM and Regularization -- 4.2 Loss Function -- 4.3 Adaptive Optimization -- 5 Experiment -- 5.1 Different Methods for Video Based Detection -- 5.2 The Convergence -- 5.3 Comparisons with State-of-the-Art Methods -- 6 Conclusion -- References -- Fusion of Auxiliary Imaging Information for Robust, Scalable and Fast 3D Reconstruction -- 1 Introduction -- 2 Related Work -- 3 A Global Approach by Iteratively Optimizing Potential Inliers -- 3.1 Step 1: Pre-processing -- 3.2 Step 2: Robust Iterative Rotation Estimation -- 3.3 Step 3: Robust Iterative Scene Reconstruction -- 4 Experiments -- 4.1 Comparison Methods and Comparison Criteria -- 4.2 Results and Analysis -- 5 Conclusion -- References -- What Visual Attributes Characterize an Object Class? -- 1 Introduction -- 2 Related Work -- 3 Unsupervised Visual Attributes Learning -- 3.1 Visual Prototypes Generating -- 3.2 Visual Attributes Learning -- 3.3 Visual Attributes Ranking -- 4 Experiments -- 4.1 Datasets -- 4.2 Experiment Settings -- 4.3 Attribute Learning Results -- 4.4 Object Categorization on AWA -- 4.5 Object Categorization on PASCAL VOC 2007 -- 5 Conclusion -- References -- Accurate Object Detection with Location Relaxation and Regionlets Re-localization -- 1 Introduction -- 2 Our Approach -- 2.1 Bottom-Up Object Proposal -- 2.2 Top-Down Supervised Object Search -- 2.3 Regionlets Object Re-localization -- 3 Experiments -- 3.1 Location Relaxation Search -- 3.2 Regionlets Re-localization -- 3.3 Run-Time Speed -- 4 Conclusions -- References -- Unsupervised Feature Learning for RGB-D Image Classification -- 1 Introduction -- 2 Related Work.

2.1 Work Related to Deep Neural Networks for Image Classification -- 2.2 Work Related to RGB-D Image Classification -- 3 Deep R2ICA Framework -- 3.1 Data Preprocessing -- 3.2 Filter Learning and Feature Encoding -- 3.3 Spatial Pooling and Normalization -- 3.4 Implementation Details -- 4 Experiments -- 4.1 RGB-D Object Recognition Benchmark [15] -- 4.2 2D3D Object Dataset -- 4.3 NYU Depth V1 Indoor Scene Benchmark -- 5 Conclusion -- References -- Non-maximum Suppression for Object Detection by Passing Messages Between Windows -- 1 Introduction -- 2 Related Work -- 3 A Message-Passing Approach for NMS -- 3.1 Affinity Propagation: Binary Formulation and Inference -- 3.2 Adapting Affinity Propagation for

NMS -- 3.3 Structured Learning for Affinity Propagation -- 4
Experiments on Object Class Detection -- 4.1 Implementation Details
-- 4.2 Results -- 5 Experiments on Generic Object Detection -- 5.1
Implementation Details -- 5.2 Results -- 6 Discussion -- References --
Stable Radial Distortion Calibration by Polynomial Matrix Inequalities
Programming -- 1 Introduction -- 2 Camera Radial Distortion -- 2.1
Extrapolation Issues of Radial Distortion Calibration -- 3 Polynomials
and PMI Programming -- 3.1 Polynomials and Polynomial Matrices --
3.2 Polynomials Positive on Finite Intervals -- 3.3 Polynomial Matrix
Inequalities -- 4 Shape Optimization for Radial Distortion Calibration
-- 4.1 Unconstrained Radial Distortion Calibration -- 4.2 Barrel
Distortion and the Polynomial Model -- 4.3 Pincushion Distortion and
the Division Model -- 4.4 Zero-Crossing Problem of the Rational Model
-- 4.5 Shape Optimization in Camera Calibration Procedure -- 5
Experiments -- 6 Conclusion -- References -- Pedestrian Verification
for Multi-Camera Detection -- 1 Introduction -- 2 Related Work -- 3
Base Detector -- 3.1 Low-Level Detection -- 3.2 Mid-Level
Aggregation.
4 Pedestrian Verification.

Sommario/riassunto

The five-volume set LNCS 9003--9007 constitutes the thoroughly refereed post-conference proceedings of the 12th Asian Conference on Computer Vision, ACCV 2014, held in Singapore, Singapore, in November 2014. The total of 227 contributions presented in these volumes was carefully reviewed and selected from 814 submissions. The papers are organized in topical sections on recognition; 3D vision; low-level vision and features; segmentation; face and gesture, tracking; stereo, physics, video and events; and poster sessions 1-3.
