

1. Record Nr.	UNISA996209754303316
Titolo	66th Porcelain Enamel Institute Technical Forum [[electronic resource]] : April 26-29, 2004, Nashville, Tennessee // William D. Faust, editor
Pubbl/distr/stampa	Westerville, Ohio, : American Ceramic Society, c2004
ISBN	1-282-31347-9 9786612313479 0-470-29120-6 0-470-29159-1
Descrizione fisica	1 online resource (200 p.)
Collana	Ceramic engineering & science proceedings, , 0196-6219 ; ; v. 25, issue 5
Altri autori (Persone)	FaustWilliam D (William Darry)
Disciplina	620.1404 22 666.2
Soggetti	Enamel and enameling Porcelain
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	66th Porcelain Enamel Institute Technical Forum; Contents; Statement of Ownership, Management, and Circulation; Foreword; Basic Steelmaking (A.I. Andrews Memorial Lecture); lean Manufacturing Principles; ISO9001 :2000 Process Mapping; Temperature Profiling: Problem Prevention, Not Just Problem Solving; Quality Systems for Cast Iron Enameling; Effects of Spray Patterns on Powder-Coating Thickness; Cost Comparison of Porcelain Enamel Powder versus Organic Powder Paint; Reducing Fishscale in Hot-Water-Tank Enamels; Steel Qualification Process for Water Heater Tank Fabrication Quantifying Bubble Structure in Water Heater EnamelsBoiler/water Heater Inside Coating with Wet Enamel; RealEas™ Nonstick Porcelain Enamel; Aluminum Stove Crates-An Innovation in Cooking; Porcelain Enameling of Cast Iron via Electrophoresis; Cast Iron Quality for Good Porcelain Enameled Parts; Robotics in the Job Shop; Waste Minimization in Cleaning and Pretreating Operations; Preparation of Cast Iron for Porcelain Enameling; Frit-Making Metal Oxides and Regulatory Compliance; Porcelain Enamel Institute Update from Washington on EPA

Regulations; The Hairline Defect: A Review of the Literature
The Physical and Chemical Characteristics of Porcelain Enamels
The Effect of Refractory Mill Additions on the Thermal Expansion of Enamel;
Changing the Rule
The Survival of American Manufacturing Depends on Everyone

Sommario/riassunto

This volume is part of the Ceramic Engineering and Science Proceeding (CESP) series. This series contains a collection of papers dealing with issues in both traditional ceramics (i.e., glass, whitewares, refractories, and porcelain enamel) and advanced ceramics. Topics covered in the area of advanced ceramic include bioceramics, nanomaterials, composites, solid oxide fuel cells, mechanical properties and structural design, advanced ceramic coatings, ceramic armor, porous ceramics, and more.
