Sommario/riassunto	Hematopoietic neoplasms are the most common animal tumors for which chemo- or radiation therapy are now given. New research, information, and images unavailable in any previous publication now make it possible to examine these diseases, categorize for treatment, and in some cases ascertain the impact on survival. A ground-breaking book in veterinary medicine, Veterinary Comparative Hematopathology is a heavily illustrated comprehensive reference on hematopoietic neoplasms in domestic and laboratory animals. The book enables veterinary pathologists and oncologists to provide more specific
