Sommario/riassunto   By the very nature, mixed and augmented reality are highly interdisciplinary fields involving signal processing, computer vision, computer graphics, user interfaces, human factors, mobile computing, wearable computing, computer networks, distributed computing, information access, information visualization, and hardware design for new displays and sensors. MR/AR concepts are applicable to a wide range of applications. ISMAR 2003 provides an opportunity for MR/AR researchers to tackle ideas, concepts, and recent research results.
