Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Real estate transactions : an institutional perspective / William Seabrooke, Hebe How, Hwee Hong -- Resolving institutional uncertainty in international real estate decisions / William Seabrooke, Paul S. Kent -- An institutional analysis of the subject matter of real estate transactions / Paul S. Kent -- Local property markets and effective flexible market institutions / Michael Goldberg -- Facilitation and constraint : institutions of urban planning in Hong Kong / Bo Sin Tang, Sujeet Sharma, Stanley Chi Wai Yeung -- Emerging institutions in Europe / Derek C. Nicholls -- Institutional aspects of real estate investment and project appraisal / Eddie Chi Man Hui, Yat Hung Chiang -- US pension funds and real estate : still crazy after all these years / Bernard Winograd -- Real estate markets in the United States / Mark J. Eppli, Charles C. Tu -- Real estate markets in the United Kingdom / Andrew Baum -- Real estate markets in Canada / C. Tsurieell Somerville -- Real estate markets in Japan / Yu Ichiro Kawaguchi -- Real estate markets in Mainland China / Chang Chun Feng, Stanley Chi Wai Yeung.
Sommario/riassunto	Real estate activity across national boundaries (investment, development and asset management) is firmly established as a major component of global economic activity. International Real Estate provides the understanding of real estate strategies and transactions that cross national boundaries. International organizations lament the narrow perspective of professionals in the real estate field, which stems from training that takes a parochial rather than international view of the practices and processes of real estate markets. This book takes an explicitly international perspective to

Nota di contenuto	Prologue: Algorithmic Antitrust – A Primer -- Algorithmic Antitrust – A Critical Overview -- Algorithmic Antitrust and Consumer Choice -- Algorithms, Big Data, and Merger Control -- Reasons to be Cheerful – The Benevolent Market Power of Decentralised Blockchains -- Blockchain Antitrust -- The Technology Innovation Time Gap in European Competition Law: Assessing the European Commission’s Approach -- Epilogue: Algorithmic Antitrust – A Questioning.
Sommario/riassunto	Algorithms are ubiquitous in our daily lives. They affect the way we shop, interact, and make exchanges on the marketplace. In this regard, algorithms can also shape competition on the marketplace. Companies employ algorithms as technologically innovative tools in an effort to edge out competitors. Antitrust agencies have increasingly recognized the competitive benefits, but also competitive risks that algorithms entail. Over the last few years, many algorithm-driven companies in the

digital economy have been investigated, prosecuted and fined, mostly for allegedly unfair algorithm design. Legislative proposals aim at regulating the way algorithms shape competition. Consequently, a so-called “algorithmic antitrust” theory and practice have also emerged. This book provides a more innovation-driven perspective on the way antitrust agencies should approach algorithmic antitrust. To date, the analysis of algorithmic antitrust has predominantly been shaped by pessimistic approaches to the risks of algorithms on the competitive environment. With the benefit of the lessons learned over the last few years, this book assesses whether these risks have actually materialized and whether antitrust laws need to be adapted accordingly. Effective algorithmic antitrust requires to adequately assess the pro- and anti-competitive effects of algorithms on the basis of concrete evidence and innovation-related concerns. With a particular emphasis on the European perspective, this book brings together experts and scrutinizes on the implications of algorithmic antitrust for regulation and innovation. .
