

1. Record Nr.	UNISA996212363803316
Titolo	Clinical men's health [[electronic resource]] : evidence in practice // [edited by Joel J. Heidelbaugh, Eric R.M. Jauniaux (international editor), Mark B. Landon]
Pubbl/distr/stampa	Philadelphia, : Saunders/Elsevier, c2007
ISBN	1-4377-1075-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (623 p.)
Altri autori (Persone)	HeidelbaughJoel J JauniauxE LandonMark B
Disciplina	613/.04234
Soggetti	Men - Health and hygiene Men - Diseases Andrology Health Status Men's Health Sex Factors
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front Cover; Clinical Men's Health: Evidence in Practice; Copyright Page; Contributors; Preface; Contents; Section 1: Overview of Men's Health; Chapter 1. Organizing Preventive Healthcare in Men; Introduction; Challenges to Implementing Appropriate Preventive Healthcare for Men; Current Age- and Risk Factor-Appropriate Guidelines for Routine Examinations, Screening Tests, Immunizations/Prophylaxis, and Counseling in Men; Implementing Preventive Healthcare Services for Men in the Office; Conclusion; Chapter 2. Diagnostic Bias in Men's Healthcare; Introduction; Clinical Assumptions and Diagnostic Bias Consequences Clinical Bias and Men's Health; Case Discussions from a Men's Health Perspective; Conclusion; Chapter 3. Global Disparities in Men's Health; Introduction; Epidemiology; Race; Global Health; Unsafe Sexual Practices; Violence; Diet, Hypertension, Hyperlipidemia, and Obesity; The Impact of Reducing Risks; Conclusion; Chapter 4. Men and the Problem of Help Seeking; Introduction; Epidemiology; Years of Life

Lost; Men's Use of Healthcare Services; Links to Masculinity; Men and Help Seeking; Men and Help Seeking With Physical Illness; Men and Help Seeking With Emotional Issues; Conclusion
Section 2: The Developing MaleChapter 5. The Newborn/Infant Male; Introduction; Considerations; Inherited Metabolic Disorders with Expression in the Neonatal Period; Anatomic Considerations; Circumcision; Care of the Uncircumcised Penis; Chapter 6. The School-Aged Male Child; Introduction; Attention-Deficit/ Hyperactivity Disorder; Bullying; Encopresis; Obesity; Conclusions; Chapter 7. The Adolescent Male; Introduction; Normal Puberty and Development; The Health Visit; Laboratory Screening Tests; Other Issues; Immunizations; Common Adolescent Male Physical Examination Findings; Conclusion
Section 3: The Adult MaleChapter 8. Cardiology; Introduction and Epidemiology; Stratification of Risk for Coronary Heart Disease; Metabolic Syndrome/Insulin Resistance Syndrome; Hypertension; Hypercholesterolemia; Additional Guidelines; Conclusion; Chapter 9. Endocrinology; Introduction; Hypogonadism; Osteoporosis; Diabetes Mellitus; Erectile Dysfunction in Diabetes; Conclusion; Chapter 10. Gastroenterology; Introduction; Dyspepsia; Peptic Ulcer Disease; Gastroesophageal Reflux Disease; Barrett's Esophagus and Esophageal Adenocarcinoma; Cirrhosis; Inflammatory Bowel Disease Irritable Bowel SyndromeDiverticular Disease; Pancreatitis; Conclusion; Chapter 11. Infectious Diseases; Introduction; Community-Acquired Pneumonia; Acute Sinusitis; Acute Otitis Media/Otitis Externa; Influenza; Viral Hepatitis; Human Immunodeficiency Virus and Acquired Immunodeficiency Syndrome; Infectious Diarrheas; Sexually Transmitted Diseases; Conclusion; Chapter 12. Nephrology; Introduction; Epidemiology of Renal Disease; Impact of Male Gender on Renal Disease; Common Symptoms and Signs Attributable to Chronic Kidney Disease and Other Renal Diseases
Common Evaluative Tools in Ambulatory Care

Sommario/riassunto

Here's the first evidence-based guide to focus solely on the various health conditions that unequally affect men. This text provides a biopsychosocial approach to diseases and disorders of male patients from birth through infancy, childhood, and adolescence, and from early through late adulthood. Replete with current evidence-based guidelines to facilitate clinical decision-making, the framework of each chapter builds upon epidemiological data centered on men. Special attention is given to the circumstances that influence men to either seek or not seek routine medical care.Provides
