

1. Record Nr.	UNISA996213129103316
Titolo	Frontiers of earth science
Pubbl/distr/stampa	Beijing ; ; Berlin, : Higher Education Press and Springer-Verlag
ISSN	2095-0209
Descrizione fisica	1 online resource
Disciplina	550
Soggetti	Earth sciences - Research Sciences de la terre - Recherche Periodical Periodicals. Périodiques.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Refereed/Peer-reviewed
Sommario/riassunto	The journal focuses on all aspects of earth science: scientific, technical, managerial, economic, and social regimes on the local, regional, and global scales. Areas of interest include but are not necessarily restricted to geology, physical geography, geochemistry, geophysics, geo-biology, soil science, meteorology and climatology, environmental science and ecology as interacting components of earth science, and their related implications for policy and decision making. Contributions on important developments in global change, interactions between the hydrosphere, atmosphere, and biosphere, and innovative technologies including satellite remote sensing, carbon sequestration, etc. are also encouraged. In addition to research papers, the journal includes reviews, letters and special issues papers on key areas of technology.
