admission.

**Sommario/riassunto**

The United Nations began as an alliance during World War II. Eventually, however, the UN came to approximate a universal organization - idlest, open to and aspiring to include all States. This presents a legal question, for Article 4 of the Charter contains substantive criteria to limit admission of States to the UN and no formal amendment has touched that part of the Charter. This book gives an up-to-date account of admission to the UN, from the 1950's 'logjam' through on-going controversies like Kosovo and Taiwan. With reference to Charter law, the book considers how Article 4 came to accommodate universality and what the future of a universal organization in a world of politically diverse States might be.

**Sommario/riassunto**

This research topic for Frontiers in Psychology highlights some of the more relevant changes that have conditioned consumer behavior in recent years-among these, the paradigm shift in marketing is worth emphasizing. Today, the market and the companies are implementing Marketing 4.0; This new marketing approach modifies both the business rules and the channels by changing the way to dialogue, interact and relation with consumers. The present Research Topic brings together 30 studies by 76 authors who analyzed the relevance of

consumer behavior changes under this new paradigm, using different theoretical and methodological frameworks. These different papers, mainly constituting original research, examine a variety of sub-topics, including online and mobile environments, value co-creation, internal marketing strategies, and diverse industries and product markets. Given this broad selection of papers, we encourage readers to draw their own conclusions about the complex phenomena of consumer behavior. Our hope is that these different perspectives will cover various gaps in the field and prompt discussion among the audience of *Frontiers in Psychology*.
