Workflow Re-engineering through Log Event-based Analysis Dependency based approach for Process Design; A Declarative Approach of Process Models; Improving Alignment of Business Models and Business Process Models for Ensuring Strategic Fit of Business Processes; Session 3: Software Development and Interoperability; An Interactive Multi-Agent Based TV Game Show Implementation; Towards Plug and Play Business Software; Formalising Problem Frames with Ontology; Session 4: Enterprise Modelling and Knowledge Management; A Proposal for Modelling Enterprise Knowledge in Virtual Enterprises Methodology for the Development of a Tacit Knowledge Management System for Virtual Enterprises

| Sommario/riassunto | During the IFAC/IFIP I-ESA international conference, supported by the INTEROP NoE and the ATHENA IP, three workshops and a doctoral symposium were organized in order to strengthen some key topics related to interoperability for enterprise applications and software.The workshops were selected to complement the conference topics, providing researchers with more time to brainstorm and then to come out, at the end of the workshops, with new research directions for the future. |

Remarks on the Missing Archeology of the Visigoths in Gaul -- General Index
	Sommario/riassunto	This volume highlights the heretofore largely neglected Battle of Vouillé in 507 CE, when the Frankish King Clovis defeated Alaric II, the King of

the Visigoths. Clovis' victory proved a crucial step in the expulsion of the Visigoths from Francia into Spain, thereby leaving Gaul largely to the Franks. It was arguably in the wake of Vouillé that Gaul became Francia, and that "France began." The editors have united an international team of experts on Late Antiquity and the Merovingian Kingdoms to reexamine the battle from multiple as well as interdisciplinary perspectives. The contributions address questions of military strategy, geographical location, archaeological footprint, political background, religious propaganda, consequences (both in Francia and in Italy), and significance. There is a strong focus on the close reading of primary source-material, both textual and material, secular and theological.
