Livello bibliografico	Monografia
Note generali	Includes indexes.
Nota di contenuto	v. I. Books 1-5 -- v. II. Books 6-9. On odours. Weather signs.
Sommario/riassunto	Enquiry into Plants and De Causis Plantarum by Theophrastus (c. 370-c. 285 BCE) are a counterpart to Aristotle's zoological work and the most important botanical work of antiquity now extant. In the former Theophrastus classifies and describes. His On Odours and Weather Signs are minor treatises.
