1. Record Nr.   UNICAMPANIAVAN0074631

   Autore   Papadia, Francesco

   Titolo   La Banca centrale europea / Francesco Papadia, Carlo Santini

   Pubbl/distr/stampa Bologna, : Il mulino, 2006

   ISBN   88-15-11069-0

   Edizione   [4. ed. aggiornata]

   Descrizione fisica 127 p. ; 20 cm.

   Altri autori (Persone) Santini, Carlo

   Disciplina   332.11094

   Soggetti   Banca Centrale Europea

   Lingua di pubblicazione Italiano

   Formato   Materiale a stampa

   Livello bibliografico Monografia

2. Record Nr.   UNISA996215313403316

   Autore   van den Dries Lou

   Titolo   Model Theory in Algebra, Analysis and Arithmetic [[electronic resource]
                       ] : Cetraro, Italy 2012, Editors: H. Dugald Macpherson, Carlo Toffalori /
                       / by Lou van den Dries, Jochen Koenigsmann, H. Dugald Macpherson,
                       Anand Pillay, Carlo Toffalori, Alex J. Wilkie

   Pubbl/distr/stampa Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer,
                       , 2014

   ISBN   3-642-54936-5

   Edizione   [1st ed. 2014.]

   Descrizione fisica 1 online resource (VII, 195 p.)

   Collana   C.I.M.E. Foundation Subseries ; ; 2111

   Disciplina   511.3

   Soggetti   Mathematical logic
                       Algebra
                       Mathematical analysis
                       Analysis (Mathematics)
                       Number theory
                       Mathematical Logic and Foundations
                       Analysis
                       Number Theory

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Some themes around first order theories without the independence property -- Lectures on the model theory of real and complex exponentiation -- Lectures on the model theory of valued fields -- Undecidability in number theory.
Sommario/riassunto	Presenting recent developments and applications, the book focuses on four main topics in current model theory: 1) the model theory of valued fields; 2) undecidability in arithmetic; 3) NIP theories; and 4) the model theory of real and complex exponentiation. Young researchers in model theory will particularly benefit from the book, as will more senior researchers in other branches of mathematics.
