1.	Record Nr.	UNISA996217070603316
	Titolo	Defining optimal immunotherapies for type 1 diabetes [[electronic resource] /] / [editors: Gregory Bock and Jamie Goode]
	Pubbl/distr/stampa	London, : Novartis Foundation, 2008
	ISBN	1-281-84052-1
		9786611840525
		0-470-69740-7
		0-470-69741-5
	Descrizione fisica	1 online resource (224 p.)
	Collana	Novartis Foundation symposium ; ; v. 292
	Disciplina	616.46206
	Soggetti	Diabetes - Immunotherapy
		Diabetes - Treatment
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Defining Optimal Immunotherapies for Type 1 Diabetes; Contents; Participants; Chair's introduction; Pancreatic pathology in type 1 diabetes in human; The b cell population in type 1 diabetes; Bone marrow expressing a diabetes resistance MHC class II allele: diabetes deviation by chronic immune stimulation; Resuscitating adaptive Tregs with combination therapies?; Cytotoxic T cell mechanisms of b cell destruction in non-obese diabetic mice; Type 1 diabetes: chronic progressive autoimmune disease; Current and past prevention and intervention trials in type 1 diabetes
		CD8 and cytotoxic T cells in type 1 diabetesGeneral discussion I; General discussion II; Genetic and therapeutic control of diabetogenic CD8+ T cells; General discussion III; Towards a curative therapy in type 1 diabetes: remission of autoimmunity, maintenance and augmentation of b cell mass; Immune markers of disease and therapeutic intervention in type 1 diabetes; Re-establishing immune tolerance in type 1 diabetes via regulatory T cells; Translating mucosal antigen based prevention of autoimmune diabetes to human; Closing remarks; Contributor index; Subject index
	Sommario/riassunto	This book is a comprehensive and up-to-date account of where we

stand in immunological strategies for preventing or treating type 1 diabetes (T1D).Brings together contributions from the leaders in the arena of clinical immunotherapy, not limited to the diabetes field exclusively, in order to delineate a road-map that would lead to future clinical trials.The book integrates information from human and animal studies.The book considers T1D within the broader context of autoimmune disease.The format contains several discussions, which address specific questions and provides
