| Sommario/riassunto | Technology and In/equality explores the diverse implications of the new information and communication technologies through case studies of their applications in three main areas - media, education and training, and work. Questions of access to and control over crucial resources such as information, knowledge, skills and income ae addressed drawing upon insights from science and technology studies, innovation theory, sociology and cultural studies. All of the chapters question the meanings of the terms 'technology' and 'inequality' and of the widespread association of technology with |
