Sommario/riassunto	This is the first book-length study to reconstruct the experiences of the abandoned heroines of the <i>Heroides</i> , which have been largely ignored by past criticism. Dr Spentzou seeks ways to isolate, characterize, and release the female voice and experience within Ovid's male-authored text. Building on a wide range of ancient as well as modern images and

reflections on gender and writing, the book attempts to map the relationship between gendered sensitivities and experience and generic expression and choices. Dr Spentzou uses the insight gained by the boom of intertextual studies in recent Latin s

Sommario/riassunto

This volume presents current work on a topic in Romance linguistics that still informs linguistic theory to this day: metaphony in the languages of Italy. Papers discuss fundamental research topics such as phonological opacity in the light of chain shifts, post-tonic harmony and consonant transparency, the role of morphosyntax in the typology of metaphony, the explanatory adequacy of feature-based versus element-based analyses, and the locus of metaphony in grammar. Other chapters present new experimental data, thus building a more accurate empirical foundation for the study of metaphony. We envision the volume to become a reference book not only for an updated descriptive survey of metaphonic patterns in Italy but also a thorough discussion of the challenges that metaphony poses for different (morpho)phonological theories. The book bridges the gap between descriptive works and theoretical thinking in the study of metaphony.
